## KILLS RATS AND MICE

### STATUTORY CONDITIONS RELATING TO USE: FOR USE ONLY BY PROFESSIONAL OPERATORS

The (COSHH) Control of Substances Hazardous to Health Regulations 1999 may apply to the use of this product at work.

PREVENT ACCESS TO BAIT by children, birds and non-target animals particularly dogs, cats, pigs and poultry.

Search for and remove rodent bodies at frequent intervals during treatment (unless used in sewers). Collect and dispose of the remains of bait and any remaining rodent bodies after treatment (unless used in sewers). You must ensure that you comply with legislation regarding the correct disposal of waste. For further guidance, contact the Environment Agency or your local Scottish Environment Protection Agency (SEPA) office.

DO NOT PLACE BAIT where food, feed or water could become contaminated (except when used in sewers).

AVOID ALL CONTACT BY MOUTH.

HARMFUL TO WILDLIFE

**READ ALL PRECAUTIONS BEFORE USE**

**HSE No. 6718**

### PRECAUTIONS

This material and its container must be disposed of as hazardous waste.

WASH HANDS AND EXPOSED SKIN before meals and after use.

STORE IN ORIGINAL CONTAINER, tightly closed, in a safe place.

In case of accident or if you feel unwell seek medical advice immediately (show the label where possible).

Wild mammals and birds may be at greater risk if this product is not used in accordance with the label.

Long-term use of this product should be avoided. It is recommended that bait not be used longer than 25 weeks. A thorough risk assessment should be conducted prior to any long-term baiting program and records of risk assessments and treatments should be maintained when carrying out long-term baiting programs. User should monitor the situation frequently, reevaluate and cease the program when rodent activity ceases.

### MOISTURE RESISTANT

**In Indoor And Outdoor Situations**

**Kills Rodents Resistant to Some  
Other Anticoagulants**

**Contains 0.005% w/w Bromadiolone**

**Contains Denatonium Benzoate Bittering Agent**

This product is approved under the  
'Control of Pesticides Regulations 1986'  
for use as directed.

**HSE NO. 6718**

**PCS NO. 93432**

Use only in accordance with the directions on the label.

**NET WEIGHT 8 kg**

Manufactured by:  
**Bell Laboratories, Inc.**  
Madison, WI 53704 U.S.A.  
[www.belllabs.com](http://www.belllabs.com)

**UK Registered Office:**  
Chaucer House  
Chaucer Road  
Sudbury, Suffolk CO10 1LN  
Tel: 01787 379295

### NOTE TO DOCTOR

Bromadiolone is an indirect anticoagulant.

Phytomenadione, Vitamin K<sub>1</sub>, is antidotal. Determine prothrombin times not less than eighteen hours after consumption. If elevated, administer Vitamin K<sub>1</sub> and continue until prothrombin time normalises. Continue determination of prothrombin time for two weeks after withdrawal of antidote and resume treatment if elevation occurs in that time.

The resistance status of the target population should be taken into account when considering the choice of rodenticide to be used.

### DIRECTIONS FOR USE

**CONTRAC BLOX** is a palatable, weather-resistant bait which may be used effectively in both moist and dry areas. Replace stale, damp or mouldy bait with fresh bait. Baits should be placed in situations which are protected from prevailing weather and are inaccessible to non-targets (such as humans, domestic animals and wildlife). Place bait in bait stations, suitable trays or containers under cupboards, behind furniture etc. for indoor use, or in bait stations, lengths of drainpipe or beneath tiles leant against walls etc. for outdoor placement. Where appropriate, secure the bait block at its placement site to reduce the likelihood of its removal by rodents, or by surges of water if intended for use in sewers.

**RATS:** Place 2 to 10 CONTRAC BLOX (usually at intervals of 5 to 10 metres) per placement. Place bait in burrows and runways, along walls, or where rats are accustomed to feed. Maintain an uninterrupted supply of fresh bait for 10 days or until signs of rat activity cease.

**HOUSE MICE:** Place 1 CONTRAC BLOX at 2 metre intervals per placement, where mice or their signs have been observed. Maintain an uninterrupted supply of fresh bait for 15 days or until signs of mouse activity cease.

Please insert the current bar code  
from the 6436-5 label.
