R50/53 Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment  
S2 Keep out of the reach of children.  
S13 Keep away from food, drink and animal feeding stuffs.  
S23 Do not breathe vapour/spray.  
S29 Do not empty into drains.  
S35 This material and its container must be disposed of in a safe way.  
S51 Use only in well-ventilated areas  
S61 Avoid release to the environment. Refer to special instructions of the safety data sheet.

The COSHH (Control of Substances Hazardous to Health) Regulations 2002 (as amended) apply to the use of this product at work.

To avoid risks to man and the environment, comply with the instructions for use.

**Intended use:** Insecticide for professional use as a crack-and-crevice treatment for the control of crawling insects such as cockroaches, ants, fleas, bedbugs and silverfish. For use in domestic premises, kitchens, hard porous and non-porous surfaces) and other public hygiene areas, outdoors and in food preparation and storage areas. Do not apply to bedding, clothing or soft-furnishings. Do not apply on or around drains.

**Instruction of use:** Shake the container a few times before using DELTA SECT 015 RTU. Open the spray nozzle by setting the symbol spray and strongly press the lever. Spray on nest, hiding places and tracks of insects. Pay special attention to any slits, cracks and crevices, especially in the c.o. pipes, sewer pipes, baseboards. For control Pharaoh ants spray wide of the path leading to the nest/sockets. On sprayed surface insecticide should form a barrier to the nest/socket. In case where tracks are not visible, the product applied to the place where insects can be found (an assembly of insects). In case of other insects, spray the place where insects sitting. In the case of re-emergence of insects, the treatment should be repeated after about two weeks.
