# AIR<sup>®</sup> CONTROL

**PYRETHRUM  
BASED**

*For use in automatic dispenser*

*Aerosol insecticide  
for domestic and civil use*

#### CHARACTERISTICS AND FIELD OF APPLICATION

**AIRCONTROL S** is an insecticide containing pyrethrum to be used with dedicated electronic automatic diffusers. A useful remedy against flying insects, it has an immediate eliminating action against flies, mosquitos, Asian tiger mosquitos, gnats, etc. **AIRCONTROL S** is suitable for disinfection of domestic and civic areas (for example homes, living quarters, public conveniences, meeting rooms, schools, residential centres, canteens, shops, workshops, warehouses, food manufacturers, hotels, restaurants bars, barracks, riding centres, stables, animal housing, means of transport such as ships, airplanes, trains, buses, motor homes, etc. The repellent action of pyrethrum extract may also help to prevent the infestation by insects of the treated areas.

#### Directions

Insert the spray can into the automatic diffuser and operate following the instructions inside the pack. For best results, fasten the electronic diffuser to a wall or rest it on a cupboard at least 2 metres above the floor and 30 cm from the ceiling. **AIRCONTROL S** is released at regular intervals that can be set anywhere between 7.5 and 30 minutes, in very small amounts to ensure constant protection against insects. A 250 ml spray can left operating 24 hours a day at intervals of 15 minutes lasts up to 4 weeks. The system is set to control insects in environments of up to 45 m<sup>2</sup>. **AIRCONTROL S** can also be used manually: Hold the spray can upright, press down the button and spray upwards, towards the middle of the room, performing sport sprays. For a medium sized room, do not spray for longer than 5 - 6 seconds.

#### Precautions for use

Do not spray onto people, pets, food or areas used to prepare food. Remove or cover any foods in the room or utensils destined for their preparation. Do not use near aquariums, terrariums or bird cages. Uncovered food that is ready to eat or being prepared must be at least 3 metres from the spray can.
