

## DIRECTIONS FOR USE

Undo cap and pierce end with drawing pin. Clear up other readily available foodstuffs. Place a few drops of Nippon, preferably in late evening, into the refillable Ant Control System or onto an impervious surface like a flat piece of plastic, glass or metal by the ant run. Change the bait daily until ant activity ceases (usually 7 to 10 days). Do not disturb feeding ants, which pass Nippon onto the entire colony. Ants are only controlled if Nippon is the main food source.

## STATUTORY CONDITIONS RELATING TO USE

FOR USE ONLY AS AN INSECTICIDE

Apply 3 to 4 drops at up to 3 bait points per nest. Replenish as necessary. DO NOT USE where food, feed or water could become contaminated.

PREVENT ACCESS TO BATS by children and animals.

REMOVE ALL REMAINS OF BAIT and bait containers.

This material and its container must be disposed of in a safe way.

Do not contaminate ground, waterbodies or watercourses with chemicals or used container

READ ALL PRECAUTIONS BEFORE USE. HSE No 8918 PCS No 957911
