One can covers house and car

**Breaks the
flea life cycle**

**Kills house
dust mites**

500ml e

Active ingredients: 0.09% w/w S-methoprene, 0.58% w/w Permethrin

Acclaim®

By the time you notice fleas on your pet there is already an infestation of pre-adult fleas in your home. These are not affected by treatments applied to your pet, so your home must be treated to eliminate them.

Flea larvae thrive in the environments created at the base of carpets, under cushions and down the back of sofas and you should be sure to treat these areas thoroughly. Hard flooring, such as tiles, concrete or linoleum will not typically require treatment, but pay attention to any cracks and crevices which could collect debris, particularly in parquet floors and between floorboards.

Acclaim® contains S-methoprene, a long acting insect growth regulator which prevents flea eggs and larvae from maturing into adults - this breaks the life cycle and gives your home continuous protection for 12 months when used as directed. It also contains Permethrin which will kill any adult fleas which may continue to hatch in the first weeks following treatment.

Acclaim® will also kill housedust mites, ants, cockroaches, ticks, earwigs, silverfish, other bristle tails, centipedes, spiders and beetles.

Your can of Acclaim® will treat 175m² - equivalent to an entire four bedroom house. It is very important that you treat the entire house and use sufficient product. Follow the instructions carefully.

Directions for use: Remove pets and birds and cover fish aquariums before spraying. Shake the can well before use. Hold the can upside down, pointing away from your body. Using a sweeping motion, apply a fine spray uniformly to carpets, rugs, upholstered furniture and in cracks and crevices in the floor from a distance of about half a metre. Avoid wetting furniture and carpeting and do not over-apply to polished wood surfaces as spotting may occur. Leave the room and wait half an hour before airing.

Acclaim® leaves no bad odour, no sticky residue and will not stain soft furnishings.

PRECAUTIONS • WASH HANDS AND EXPOSED SKIN BEFORE MEASURING AND AFTER USE • KEEP IN A SAFE PLACE • KEEP AWAY FROM SOURCE OF IGNITION • NO SMOKING • DO NOT TOUCH TREATED SURFACES UNTIL DRY • KEEP OUT OF REACH OF CHILDREN • DO NOT HANDLE TREATED FABRICS UNTIL DRY AND AIR THOROUGHLY BEFORE USE

Avoid contact with eyes. If in eyes flush with plenty of water. Get medical attention if irritation persists. If on skin remove contaminated clothing and wash affected areas with soap and water.

CAUTION • Pressurised container, protect from sunlight. Do not expose to temperatures exceeding 50°C (122°F). Do not pierce or burn, even after use. Do not spray on or near a naked flame, or any incandescent material.

Very toxic to aquatic organisms. May cause long-term adverse effects on the aquatic environment.

To avoid risks to man and the environment, comply with the instructions for use. All bats are protected under the Wildlife and Countryside Act 1981. Before treating any structure used by bats, consult Natural England, Scottish Natural Heritage or the Countryside Council for Wales.

The can of Acclaim® will treat 175m². This is the average size of a four bedroom house.
