

## DIRECTIONS FOR USE

### Application rate:

Spray directly on to surfaces. A 4-5 second burst suitable for 1m<sup>2</sup> or 2-4 linear metres of skirting board.

**To flush insects out,** spray hiding places from 5cm and then spray crawling insects directly for rapid kill. For several weeks of effective residual control, spray from 30cm until wet onto surfaces where insects crawl or hide. Concentrate spray around cracks, corners, behind cookers and refrigerators, and under sinks, mattresses and bed frames. Re-spray surfaces after cleaning; repeat when needed.

**Flies, wasps and mosquitoes:** Spray walls of stables and outbuildings, windows and door frames, shady humid surfaces out of doors, wheelie bins and other places where flies, wasps and mosquitoes like to rest. Repeat treatment when necessary.

**Dog ticks and fleas:** Spray carpets and other places where these pests are found, around skirting boards and cracks in walls, between cupboards, etc. Do not spray the animal. Make sure the area where the animal sleeps is dry before the animal re-enters.

**Carpet beetles and clothes moths:** Spray under carpets, rugs and furniture, in cupboards, wardrobes, drawers, etc. Repeat at regular intervals.

**Bed bugs:** Spray bed frames, furniture etc., paying special attention to cracks and crevices; also seams of mattresses, and any place where the bugs conceal themselves. Mattresses must be dry before putting the sheets back on.
