

Zero In Wasp Nest Destroyer Foam is an insecticidal foaming spray for killing wasps in the nest. The nest should be treated late evening or early morning when the wasps are less active. Contains sufficient foam for around 2-3 treatments.

DIRECTIONS FOR USE

- Shake well before use.
- Keeping the can upright and standing at least 2 metres from the nest
- Direct and spray the foam at the nest entrance.
- Spray for 8 seconds to thoroughly wet the nest, paying attention to the entrance.
- Do not stand directly underneath the nest and wear suitable clothing should the wasps become active.
- For larger nests, a 12 second burst of spray should be applied.
- Stand well back from the treated area after application.
- If the nest entrance is not visible spray where the wasps activity is seen, such as through holes or gaps in walls etc.
- If wasp activity is seen again after treatment, which is not unusual, repeat the application.

PLEASE NOTE

For any wasp treatment protective clothing is recommended. If treating a nest outdoors consider the wind direction. Avoid contact with paint work or test on an inconspicuous area first. The foam may damage plants and shrubs. The treating of a wasp nest from a ladder should only be considered by professionals.

STATUTORY CONDITIONS RELATING TO USE FOR USE ONLY AS AN INSECTICIDE.

AN 8 SECOND BURST WILL RELEASE 77MG D-PHENOTHRIN (TECHNICAL) AND 240MG TETRAMETHRIN (TECHNICAL).
