

FOLDABLE LOFT BOARD

A brand new product to the industry. These foldable loft boards are ideal for use in loft spaces with no flooring. Once open they provide a 600mm x 1300mm working area. Their low profile and carry handles make them easy to transport.

Instructions for use:

- 1: Access area with boards in folded position.
- 2: Unfold boards outwards and place evenly over joists.
- 3: Push boards tightly together and ensure there is adequate support at the ends of the boards.

Precautions:

- Always transport boards in their folded position using the handles.
- Ensure the boards are not placed directly on pipes or electrical cables.
- Never exceed the max weight limit.
- If there is any visual damage to the boards or hinges ie: cracks or splits then do not use.
- Do not use boards for anything other than their intended use.

Maintenance:

- Treat boards with care, no maintenance is required.

PRODUCT FEATURES

These boards have been independently tested to hold up to 125kg per board.

The non-slip surface and underside grip tape means you have an extremely stable surface when working in lofts without flooring.

With their compact design they fit easily and neatly into vans and cars making them easy to transport. Constructed from a hard-wearing and durable material they are perfect for everyday use.

The foldable light weight design makes them easy to get in and out of loft hatches.
